VOLUNTEER EXPERIENCE

Senior Scientific Member

December 2018 - March 2019

Sharif Datadays National Competition, Tehran, Iran
(more than 500 participating teams)

- Our team designed some tasks that could be solved by Machine Learning and Deep Learning techniques, based on advertising data gathered from Divar platform.
- This was the first Data Analytics event held by Sharif University of Technology consisting of different stages. Its main goal was to broaden the appeal to work on problems related to data analytics. It was also a large-scale attempt to assess the level of knowledge in this field in Iran.
